# APMG-International AgilePM™ Foundation Online

The Agile Project Management™ (AgilePM) certification aims to address the needs of those working in a project-focused environment who want to be agile.

Agile projects are characterised by highly self-empowered teams delivering products incrementally with a focus on early delivery of real benefits to the business. Unlike more traditional approaches, Agile projects fix time, cost and quality at the early phases of the project and manage contingency by developing a clear view of priorities in collaboration with the business.

Based on the proven fundamentals within DSDM Atern, the AgilePM certification lives up to its name by providing users of the methos with the core principles needed to facilitate a successful project, whilst allowing a degree of scope and agility that not many other methodologies provide. ILX Group's Agile Project Management™ (AgilePM) Foundation e-learning has been fully accredited by the APM Group and will prepare you for the formal examination.

## WHAT'S INCLUDED
- ✔ 12 months online access to accredited AgilePM Foundation e-learning
- ✔ Full tutor support by phone or email for the duration of your learning

## Optional extras:
These options are also available during the checkout process to enhance your learning experience:
- ✔ AgilePM manual - the "Agile Project Management Handbook version 1.1" manual is listed by APMG as recommended reading. The AgilePM Handbook is intended to support the accredited Agile Project Manager Practitioner training course, as well as providing the definitive source for the Agile Project Manager Foundation and Practitioner exams.
- ✔ AgilePM Foundation exam.

## Target Audience
With a clear, concise and detailed perspective on project productivity, the Agile PM certification is useful to all candidates and competency levels ranging from highly experienced project managers to those new to the industry.

## Exam format
- ✔ Multiple-choice
- ✔ 60 questions per paper
- ✔ 30 marks required to pass (out of 60 available) - 50%
- ✔ 60 minutes duration
- ✔ Closed-book.

## LEARNING SYNOPSIS

### SESSION 1 – INTRODUCTION TO AGILE

Introduction to the basic concepts of AgilePM and its history, along with its eight underlying principles.

### SESSION 2–ROLES & RESPONSIBILITIES

Introduces the roles and responsibilities that are recommended by DSDM Atern.

### SESSION 3 – PREPARING FOR AGILE

This session examines the way AgilePM views the project constraints, explains the factors affecting project success and describes the AgilePM approach to testing and configuration management.

### SESSION 4 – PROCESS & PRODUCTS

This session examines how the AgilePM views style differs from a more traditional project approach. It goes on to look at the phases of the Agile lifecycle and the different configurations, and looks at the key documents used across the Agile lifecycle.

### SESSION 5 – COMMUNICATIONS

A detailed look at how AgilePM uses different techniques to improve project communications.

### SESSION 6 – PRIORITISATION, TIMEBOXING, CONTROL & RISK

This session looks at techniques such as the MoSCoW principle and the concept of Timeboxing in an Agile project. It goes on to look at maintaining control in an Atern project and describes the way in which Agile helps to mitigate risk.

### SESSION 7 – REQUIREMENTS, ESTIMATING, MEASUREMENT, QUALITY & PLANNING

This session describes the estimating and measurement activities used in an Agile project. It goes on to explain how Atern addresses quality and the approach to planning in an Atern project.

### SESSION 8 – EXAM TECHNIQUE

This session introduces users to the format of the AgilePM Foundation exam and provides some useful tips when taking the examination.

### SESSION 9 – EXAM SIMULATOR

A timed exam simulator, which provides access to a comprehensive database of practice questions.
